

Gas Analysis

# Sample gas probe GAS 222.20 DH

In many applications gas analysis is the key for safe and efficient control of process flows, environmental protection and quality assurance. In extractive gas analysis the location of the gas sampling point is crucial for the reproducibility and accuracy of the analysis results.

The specific filter capacity, corrosion resistance and functional equipment requirements for the probe arise from the composition of the sample gas.

However, operating costs are also an important criterion in the selection, as the sampling points are frequently located at hard to access points in the system. Effective particle filter backwashing options and low maintenance characterise the extensive GAS probe series.

Heated probe with downstream filter and weather hood

The downstream filter can easily be removed by turning the handle  $90^{\circ}$ 

The probe body and the area around the screw connection for the heated sample gas line are completely isolated

Steam-heated

For dust loads up to 2 g/m<sup>3</sup>

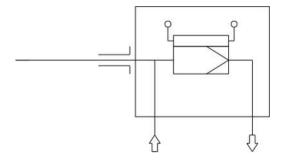

The probe has no innate ignition source and is therefore suitable for use in Ex areas.

Bühler Technologies GmbH, Harkortstr. 29, D-40880 Ratingen

# **Technical Data**

### Gas Probe Technical Data

Probe operating temperature:	max. 200 °C						
Ambient temperature:	-20 to +100 °C						
Max. operating pressure:	6 bar						
Max. steam pressure:	5 bar						
Parts in contact with media:	Flange: 1.4571 Seals: Graphite/1.4404						

# **Ordering instructions**

The item number is a code for the configuration of your unit. Please use the following model key:

4622220	0	9	9	0	9	X	(	)	0	9	9	9	9	9	9	9	Product Characteristics
																	Flange/approval
																	DIN DN65 PN6
																	Power supply sample probe
																	Steam
							Calibrating gas co										Calibrating gas connection
						0											No calibrating gas connection
						1											6 mm
						2											6 mm + check valve
						3										1	1/4"
						4										1	1/4" + check valve

# **Options**

The base unit becomes functional by adding accessories suitable for the application. Please refer to accessory data sheet no. 461099 for information.

Please also refer to data sheet no. 461000 "GAS 222 Gas Probes" for a general description.

# **Dimensions**
