The Nivovent 75 DC featuring the Bühler “easyjust” technology is a compact economic combination of level switch and precise temperature control with LED display. The unit can provide two temperature alarm/switch outputs in addition to two level contacts.

The “easyjust” system simplifies the adjustment of the level contacts. The system consists of level contact cartridges that clip onto a gold plated contact board which incorporates the Pt100 temperature sensor. Both the level contacts and the temperature controls clip directly onto the contact board thus eliminating wiring.

The unit has a DIN 24557 flange for ease of installation and a variety of electrical terminations. The connection between the terminal blocks and the contact board is also a quick change type making this unit very adaptable for a wide variety of applications.

The Nivovent 75DC in the configuration shown overleaf complies with the Daimler requirements. It provides two M12 connector sockets, a temperature display and preset level contacts.

Please note that our programme contains more Daimler specific versions of the Nivotemp and Nivovent series.

- Combination of breather/filter, level and temperature control
- Adjustable alarm outputs for temperature
- Cordless, adjustable level contacts
- High float sensitivity
- Easy installation
- Maintenance free (except filter element)
- High visibility LED display
- Standard length 250, 370 and 520 mm
- Clogging indicator
Technical Data

Operating pressure max. 1 bar
Operating temperature max. 80 °C
Spec. gravity of fluid min. 0.8 kg/dm³

Material
Float SK 610 hard PU
Switch tube brass
Flange PA
Breather PA
Retention rate SM-L (3 µm)

Level contact
Function NC / NO*
Min. distance between contacts 40 mm
Max. voltage 24 V
Max. current 0.5 A
Max. contact load 10 VA
* NC = normally closed / NO = normally open (all figures at empty reservoir)

Thermotronic 71
Range of temperature display -20 to +120 °C / 4° to 248 °F
Range of alarm indication 0 to +99 °C or 32° to 178 °F
Programmable set points 2
Material housing PA, IP65
Display four digit seven segment-LED display, light emitting diodes for status display
Current consumption at power up about 140 mA for 100 ms
Operating current consumption approx. 30 - 50 mA
Supply voltage 24 VDC ±10 %
Output PNP
Ambient temperature 0 - 70 °C
Accuracy 1 % of full range
Resolution 1 °C / 2 °F
Programming via three touch keys
Temperature sensor PT 100

General description of Thermotronic 71
The Thermotronic 71 is a combined microprocessor controlled digital display and control unit for monitoring and stabilizing the operating temperature in fluid power systems.

The actual temperature is displayed on a high visibility LED display. The status of the entire unit (output, sensor, broken wire) is indicated by separate LED’s. The temperature unit can be set to Celsius or Fahrenheit. Programming is by touch keys. The settings are protected against unauthorized operation by key lock.
